Grecale Folgore

Grecale. Everyday Exceptional.

Naming cars after the most famous winds in the world is a tradition at Maserati. It continues with a new SUV, named after the fierce northeast wind of the Mediterranean Sea: The Grecale.

The new Grecale is powered by the spirit of everyday adventure with everything you would expect of a Maserati SUV. From balanced and harmonic exterior lines to best-in class top speed, it will leave you in awe with its incredible comfort, opulent interiors and superior rear seat roominess.

Four trims have been introduced as part of the new Grecale Range: Folgore, Trofeo, Modena and GT.

Grecale Folgore is the first full electric SUV in Maserati's history. As such, it completes the Grecale family, the fullest range ever, with internal combustion/hybrid or full-electric engine.

Grecale Folgore is entirely designed, developed and produced in Italy and is equipped with a 105-kWh battery using 400V technology. Maserati's new electric SUV can deliver as much as 820 Nm of torque, guaranteeing performance typical of the brand. Courtesy of the 100% electric propulsion, it offers 410 kW and a top speed of 220 km/h.

The Grecale Trofeo trim, powered by a high performance 530 hp V6 based on the MC20 derived Nettuno engine, takes everyday adventures to the next level with its raw power and exceptional performance.

The versatility of the Grecale comes to life with the Modena trim. Embodying a sporty, urban, and contemporary spirit, the Modena boasts a four-cylinder mild hybrid 330-hp engine.

The GT trim, powered by a four-cylinder mild hybrid engine capable of delivering 300 hp, elegantly underlines the original Maserati charm and elegance. The exotic details of the Grecale GT gracefully express the brand's passion for luxurious details and ever-so-visible Italian style.

The new Grecale embodies Maserati's all-Italian audacity in making luxury and performance part of the daily routine.

Make your everyday exceptional with the new Maserati Grecale.
